**October 12, 2011**

The photos were placed at the front of this document because seeing the contrast from 2008 photos to the 2011 final project photos far better illustrates what words could describe about the vast improvement in safety that MVC's 2009 Community Streets Project provided for the residents of Resort Subdivision and Bean Ridge Corporation Subdivision here in the Village of Manley Hot Springs.

Manley Village Council would like to thank the Denali Commission, Western Federal Land Highway, FHWA-IRR staff Region 10, Bureau of Indian Affairs – Alaska, and Alaska Industrial the contractor that was awarded the project.

This project was the first of its kind here in the Interior of Alaska and MVC believes that it took everyone involved to make the project the huge success that it is.

WFLH Engineer James Davis III was given task to provide the Quality Assurance, Alaska Industrial's Robin Miller and Preston Wheeler served as project engineers both adding their expertise to the project, and last but not least Sam Schneider, Superintendent with his crew of professional road builders who got started late but managed to complete on schedule. As we watched the project progress it was remarkable how through every obstacle that surfaced throughout the project everyone worked toward the same purpose of providing the best product possible and MVC believes that the project exceeded everyone's expectations.

Sincerely,

Lawrence Bredeman, Transportation Coordinator
